CELLg8® Liposomes

Clinically-Validated Nutrient Delivery

- **Prevents Nutrient Degradation**
- **Increases Uptake Into Bloodstream**
- **Increases Cellular Absorption**
- **Reduces Potential Side Effects**

CELLg8® Liposomes Deliver

Made in the USA.

Manufactured without high heat, pressure, or solvents.

Made of the same molecules as our cell membranes.

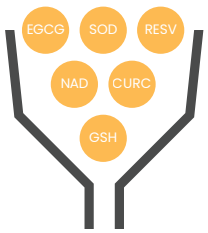

Protect nutrients from degradation in the digestive tract.

Shuttles nutrients across the gut lining into the bloodstream.

Deposit nutrients directly into cells for high absorption.

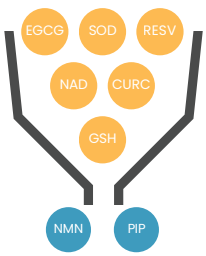

Longevity & Cellular Health

Solution for Bioavailability Bottleneck Common to Longevity Ingredients

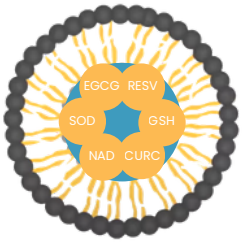

First Step Back

Initial excitement for new longevity ingredients is often soon tempered by the bioavailability bottleneck.

Two Steps Forward

Solutions are found, but are often incomplete, make modest gains, or are saddled with other issues.

Broad Solution

CELLg8® Liposomes address multiple underlying causes: poor absorption, degradation, first-pass metabolism.

Available Liposomal Bulk Ingredients

- Vitamin B12
- Vitamin C
- CoQ10
- Curcumin
- Vitamin D
- Vitamin D3K2
- Quercetin
- Multivitamin
- Ashwagandha
- Apigenin
- Berberine
- Green Tea
- Glutathione
- Resveratrol
- NAD
- NMN
- Iron
- Magnesium
- Zinc
- Calcium

Clinically Substantiated Benefits

CELLg8® liposomes have multiple clinical studies validating their efficacy and benefits.

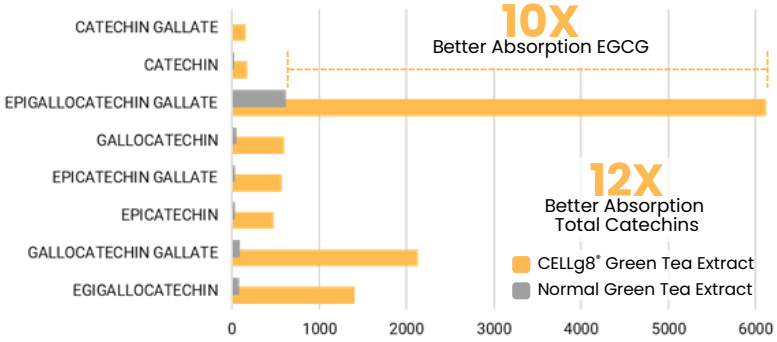

Vitamin C

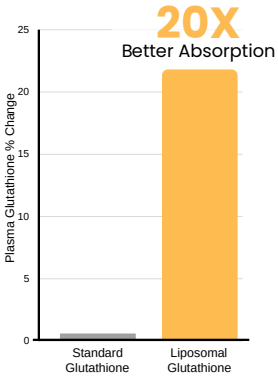

Multivitamin

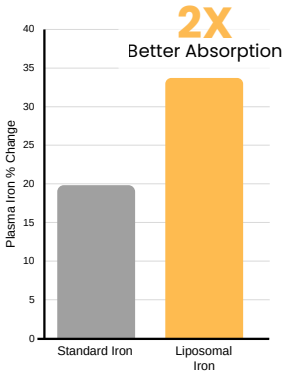

Green Tea (EGCG)

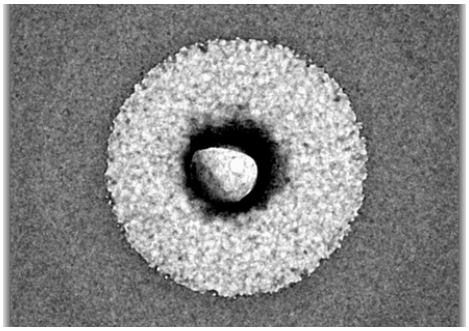

Glutathione

Iron

TEM image of liposome with encapsulated nutrient.

Fully Tested, Fully Validated

CELLg8® liposomes undergo industry-leading testing ensuring functional and efficient liposomes.

Transmission Electron Microscopy (TEM)

Encapsulation Efficiency

Dynamic Light Scattering (DLS)
